High school, 2017 – 2022
GPAX 3.87

SOFT SKILLS

- Client communication
- Requirements gathering
- Customer service
- Teamwork
- Problem solving

LANGUAGES

Thai	Native
English	Intermediate

NATTAPHAT NONTHAWONG

Software Engineer & Web Developer

PROFILE

Software engineering graduate. Since June 2026 I've built 7 websites, systems and LINE apps (6 for clients) at WF LABs, the studio I run with my brother. I agree on a PRD with the client before building, so there's less rework.

EXPERIENCE

Software Engineer
Jun 2026 – Present
WF LABs, Bangkok

- **500DAY**: website and stock system for a construction company. Crews request materials on their phones and the warehouse scans a QR code to hand them out
- **Pink Symphonic**: LINE CRM bot for a concert. Guests signed up for a free photo and the organiser got a customer list. I signed up **465+ people** at the door myself
- **MeMo**: our own office assistant on LINE. It reads everyday Thai messages and saves them as notes, reminders, expenses or team tasks
- **E-Leave**: online leave system for the Ministry of Interior's ICT Center and its 12 regional centres. Staff request leave and supervisors approve it
- **FDC**: prototype that helps Royal Thai Army Artillery crews aim. A device on each gun sends its position and heading to the fire direction centre
- **Blue Ocean Traders**: Thai/English product catalogue for a building materials importer, with a quote button on every page and an admin panel for staff
- **ONSTAGE**: Thai/English website for a concert promoter. Staff update it themselves in a Thai admin panel with autosave and undo

Content & Marketing
Jun 2026 – Present
WF FixIT, our computer repair shop

- Film and edit TikTok and Facebook clips of our repair jobs, 2–3 a week (**44 so far**)

Software Developer Intern
5 Jan – 24 Apr 2026
Army Cyber Center, Royal Thai Army

- Built a system to manage trainees on the Center's cyber courses, using React (Vite), shadcn/ui, Tailwind CSS, TanStack Query and React Router v6
- Trained in networking and security: VLANs, VMware, pfSense, Splunk, Snort, Nmap, Metasploit and the OWASP Top 10

Service Staff Hachiban Ramen, part-time — Jun – Aug 2024

Juice Bar Crew Boost Juice Bars, part-time — Apr – Jul 2023

SKILLS

Programming	TypeScript, JavaScript, Python, SQL, C++
Front end	React, Next.js, Vite, Tailwind CSS, shadcn/ui
Back end	Node.js, Express, FastAPI, PostgreSQL, Prisma
LINE	Messaging API, LIFF
DevOps	Docker, GitHub Actions, Vercel, Cloudflare, Linux
Embedded	ESP32-S3, FreeRTOS, LoRa, MQTT
Design	Figma, Photoshop
